Advanced Exhibit Methods Honored With National Exhibit Design Award.

Irvine, CA (March 10, 2008)...Advanced Exhibit Methods, a national trade show exhibit design, manufacturing and convention services company located in Irvine, CA received The 2007 Delta System Inline Exhibit Design Award.

This industry award is presented each year for the best visually engaging exhibit design utilizing Delta Systems custom modular exhibit materials with large format graphics. The competition is open to over 350 dealers. The presentation was made on March 10 during the National Exhibit Dealer Conference in Las Vegas, Nevada.

On receiving the award Richard Diess, president of Advanced Exhibit Methods, expressed appreciation to Laarhoven Design, a leading U.S. manufacturer of custom modular and portable exhibits, his client Tamalli, Mexico's leading tamale maker, and "the opportunity to design and build a unique exhibit that characterizes the Tamalli image and brand identity."

Advanced Exhibit Methods with over 25 years of experience is located in a 25,000 square foot building at 1881 Kettering in Irvine, CA. The company has a broad range of experience in Aerospace, Insurance, Computer Software and Hardware, Engineering, Medical and Food Industries. National client experience includes AIG, AON, Autodesk, Baxter, Parsons Engineering, Swiss Water, HITCO Carbon Composites and Earth Tech. Locally-based companies have included QLogic, Biolase, Toshiba and Bermad Irrigation.

For more information about Advanced Exhibit Methods, and the company's wide range of services from large-scale custom exhibit manufacturing to small portable exhibit purchase or rental, including complete trade show management services, contact Richard Diess at (800) 839-4424 or richard.diess@advancedexhibitmethods.com
